

AMP-Ohio Makes The EXACTER® Outage-Avoidance System Available to Member Communities

(Columbus, Ohio) - American Municipal Power- Ohio (AMP-Ohio) a municipal power provider who is on the cutting edge of proactive reliability programs in the country has entered into an agreement with Exacter, Inc. to make available The EXACTER® Outage-Avoidance System to AMP-Ohio member communities. "We are working with Exacter, Inc. to assist our 123 community member electric companies to establish reliable power as a part of an economic development program in our region," stated Larry Marquis, Vice President of Technical Services for AMP Ohio. "Our goal is to help our members become the standard for reliable power and have a distinct advantage for attracting new manufacturing development to their communities."

AMP-Ohio also hosted a conference on field reliability at its facilities in late March of 2008 that attracted utility engineers from seven states and Canada.
